

RomeRock Association, Inc. Driveway Culvert Application

Only the RomeRock Association is authorized to install culverts for driveways and/or roadsides on Association-owned roads. Culverts must be covered as soon as possible as they can float and become dislodged during heavy rains. When covered, roadside culverts must maintain a slight swale to allow water runoff to be directed to the nearest open drainage ditch or clean-out grate, if one was installed.

Lot #: _____ Street: _____

Owners name: _____

Permanent address: (Leave blank if same as installation location)

Primary Phone: _____ Secondary Phone: _____

Email address: _____

Culvert location on lot: (facing lot from street)

Check One: Left Center Right Full Lot

Length of culvert requested: _____

Your cost only covers the installation of the pipe and not the filling in of the ditch with dirt—this is your responsibility.

Your property will be scheduled when both the money and this request are turned into the RRA office.

Estimated cost of the installation: \$ _____
(based upon 12" diameter pipe)

We will notify you after completion of any adjustments (refund or money still owing) due to pipe diameter and length.

The driveway location must be clearly marked

Signature of owner: _____ Date: _____
